

# Doktorandenseminar über Quantenchemische Berechnungen mit TURBOMOLE

jeweils montags, 10:30 Uhr, im Seminarraum 803 (Geb. 30.44)

- |                 |   |
|-----------------|---|
| <b>16.10.17</b> | <b>Nils Schieschke</b><br>Efficient Hartree-Fock and DFT calculations             |
| <b>23.10.17</b> | <b>Johannes Heuser</b><br>MP2 and Coupled-Cluster calculations                    |
| <b>06.11.17</b> | <b>Kevin Reiter</b><br>IR, Raman and VCD spectra                                  |
| <b>13.11.17</b> | <b>Fabian Mack</b><br>NMR shielding constants at levels HF, DFT and MP2           |
| <b>20.11.17</b> | <b>Xin Gui</b><br>Electronically excited states with DFT                          |
| <b>27.11.17</b> | <b>Twinkle Yadav</b><br>Tools for wave function analysis                          |
| <b>04.12.17</b> | <b>Christoph Holzer</b><br>Electron correlation in the random phase approximation |
| <b>11.12.17</b> | <b>Yannick Franzke</b><br>Relativistic effects                                    |
| <b>18.12.17</b> | <b>Asfaw Yohannes</b><br>Molecular dynamics, genetic algorithms                   |
| <b>15.01.18</b> | <b>Christoph van Wüllen</b><br>Parallel computing with TURBOMOLE                  |
| <b>22.01.18</b> | <b>Stephan Kohaut</b><br>Periodic boundary conditions                             |
| <b>29.01.18</b> | <b>Jessica Groß</b><br>Reaction pathways and transition state optimization        |
